

Position Announcement

Postdoc Research Associate

The Office of the Texas State Chemist at Texas A&M University has an immediate opening for a Postdoc Researcher in bioanalytical chemistry. The successful candidate is expected to have a Ph.D. degree in chemical or biological sciences with a special emphasis on biochemistry, analytical chemistry, and/or mass spectrometry. Applicants with a background in food and nutrition sciences may also fit uniquely in this position. Knowledge of organic chemistry is beneficial. The research projects mainly involve employing mass spectrometry to monitor mycotoxins and contaminant residues in animal feed and human food. Besides the mass spectrometry analysis, the Postdoc is also expected to develop and validate various sample preparation methods. The Office of the Texas State Chemist is equipped with the state-of-the-art analytical instruments including Waters UPLC Quattro Premier XE and Agilent GC/MS. In addition, the Office has access to a Thermo Surveyor HOLC-LTQ for various research projects. Salary is commensurate with experience. Anyone who is interested in this position must apply through the Greatjobs website at <http://greatjobs.tamu.edu> (NOV# 03942) and include with their application a copy of their latest CV and a cover letter.
